**Letter of Recommendation**

To Prospective Employers:

This letter is to serve as a recommendation for Dr. Bob Scott in his capacity as a forensic veterinarian. I have had the great good fortune to have used the services of Dr. Scott in the capacity of an expert witness and am strongly endorsing his services. Dr. Scott is an energetic, competent and insightful expert witness who is an asset to any, investigator, attorney or insurance person involved with handling, a forensic veterinary issue. .

I have been a trial attorney for over 20 years. I have tried to jury verdict more than 250 cases. I have tried to bench verdict a huge number of other case. I have represented individuals and corporations on both the plaintiff and defense side and have also done a variety of criminal defense work. During the course of my 20 years of professional trial work I have employed a large number of expert witnesses. I have been involved in the hiring use of experts in diverse fields such as mechanical engineering and bio-technology as well as a variety of medical issues and numbers of abstract, scientific, mathematics and chemical issues for which expert testimony was necessary. In the context of having to use and hire experts I have also cross examined hundreds of expert witnesses on the opposing side.

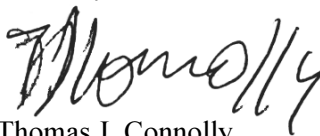

It is my strong opinion that Dr. Bob Scott is an excellent witness and an asset to any plaintiff or defendant case. Dr, Scott is a common sense and knowledgeable witness. He is willing to work hard on the issues and is enthusiastic about being presented with a complex problem. He takes the initiative, Dr. Scott is also a team player, and is anxious to with offer expert witnesses in order to increase his understanding and increase the base of understanding of the entire team working on the case.

Dr. Scott is also an excellent person to person teacher. Not only is he able to teach the attorney those things necessary to properly understand the complex issues that confront in a case but also is able to explain those same things to a lay jury. The capacity to speak candidly and intelligently about complicated matters is a gift indeed.

Dr. Scott is any asset to any individual or company who needs a forensic veterinary issue solved. I would more than willing to discuss the matter further with anyone who has a need to review Dr. Scott's qualifications and to make a decision on the hiring of Dr. Scott. It is my belief that in my case the presence of Dr. Scott made all the difference. In fact, the review of the jurors subsequent to the favorable verdict indicated that Dr. Scott's testimony was key to the successful outcome. If you have any further please don't hesitate to get in touch.

Sincerely
