

Vision Pay & Display

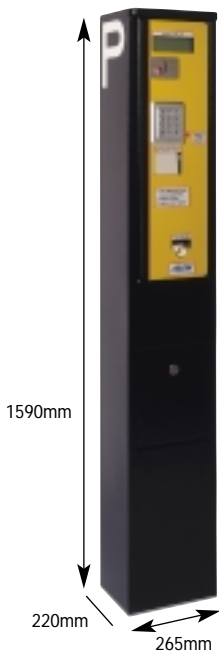

Vision Pay and Display Machines

For a secure, discreet and user friendly operation

BLICK ALFA PARKING SYSTEMS

Blick Alfia's Vision pay and display models are outstanding as the machines that don't stand out. Their compact, slim design and choice of colours mean they blend in easily with any environment; an important benefit when so much attention is paid to eliminating the profusion of 'street clutter'. Though discrete, Vision machines are robust enough to withstand the abuses of everyday life while providing reliable, user-friendly operation.

Vision 3000

Vision 3000 and Vision 2 with cash box in pedestal

The slimmest pay and display machine on the streets, Vision 3000 is only 265mm wide, harmonising with virtually any environment. A wide choice of colours ensures Vision machines are nevertheless easily seen by users. The ultra secure 4 litre cash box, located apart from the ticketing machinery, makes collection easier.

Vision 2 is available with the cash box located in either the pedestal or machine. Both versions accept season tickets, and decremental and smart cards in addition to cash. The tickets are large, making them more visible to attendants. There's also a keypad option where users are required to enter their registration number, to prevent part-used tickets being passed on to other parkers.

Dimensions - Vision 3000:

- Width 265mm
- Height 1590mm
- Depth 220mm

Vision 2

Dimensions - Vision 2 with cash box in pedestal:
