m i d n i g h t g r a v i t y

1) Welcome to the Readme File

Installing the midnightgravity skin should be rather problem-free. If, however, this completely confuses you, feel free to email me @ dizzynoise@mac.com
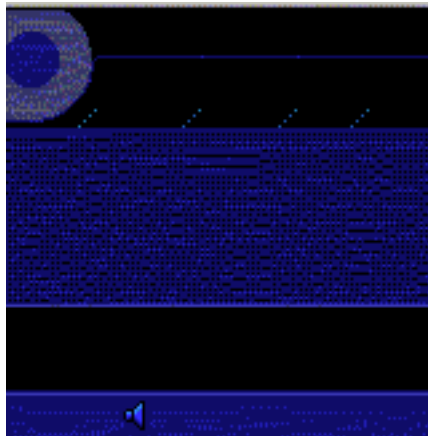

II) Updates & Garbage

By clicking on the document titled "click_here.htm" , it will launch a page that will automatically check our website for updates. Hoora! Yes, we do update the skins by user feedback. Got feedback? Email: dizzynoise@mac.com

III) Want to change your look again?

You don't have to search through Palmgear.com to find them, just open the document titled "click_here.htm" , that came with your Audioplayer skin, and click on "Get More Skins!" All of our audioplayer skins that are available (and some not even out on Palmgear.com yet!) are there for download! It's fast, easy, and hassle free!

IV) A quick message:

Because of troubles getting the Palm OS emulator to work correctly, the "screen shots" are simply the background bitmaps. (This is why they have no buttons, etc.)

Some changes may have taken place in order to improve visibility.
